

Ignitor[®] III ELECTRONIC IGNITION

Our all new Ignitor III ignition modules are designed for the serious performance enthusiast who demands serious power. You have seen the performance increases the Ignitor and Ignitor II series of electronic ignitions have brought. Now get ready for more... 5 times more spark energy than points systems. Ignitor III modules provide ignition box performance... without the "box"! For the maximum Ignitor III benefit, select one of our Flame-Thrower III or HC ignition coils from the coil section of this catalog.

NEW

FEATURES

- Multiple sparks thru the entire RPM range.
- Integrated digital REV limiter with LED feedback for precise RPM setting.
- Memory safe function stores settings eliminating unintended changes to Rev limit.
- Adaptive dwell maintains peak energy throughout the entire RPM range, reducing misfires while improving engine performance.
- Peak current level is reached just prior to spark for maximum energy without the heat build-up, increasing coil performance and module reliability.
- Adjusts spark timing at higher RPMs to compensate for the inherent electronic delay.
- Senses startup and increases energy for quicker, easier starting.
- Thermal clad surface mount construction for superior reliability.
- Built-in reverse polarity and over current protection shuts down the system, preventing component damage.
- Not compatible with CD or Multi-Spark boxes.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-22)
- Guaranteed for 30 months... We Stand Behind It!

Ignitor III vs. Breaker Point Energy

ELECTRONIC IGNITION CONVERSIONS

FEATURE COMPARISON

IGNITOR[®] Ignitor[®] II Ignitor[®] III

FEATURE	IGNITOR [®]	Ignitor [®] II	Ignitor [®] III
Fits entirely inside the distributor. No "Black Box" to clutter the engine compartment	✓	✓	✓
Stable timing... No need for adjustment	✓	✓	✓
Epoxy molded module makes module impervious to dirt, oil, grease and moisture	✓	✓	
Hall Effect integrated circuit.. No points to burn no moving parts to break	✓	✓	✓
Surface Mount Technology	✓	✓	✓
Legal in all 50 states and Canada (C.A.R.B. E.O. #D-57-22)	✓	✓	✓
Compatible with most point type ignition coils	✓	✓	✓
Adaptive dwell control maintains peak energy throughout the entire RPM		✓	✓
High RPM timing correction		✓	✓
Engine Start-up energy boost		✓	✓
Reverse polarity and over current protection		✓	✓
Compatible with low resistance ignition coils		✓	✓
Thermal Clad construction			✓
Integrated adjustable REV Limiter with LED feedback			✓
Multi-spark ignition			✓

APPLICATION NOTES

The Ignitor III is a high performance ignition system with special application and operational requirements. It is imperative that applications equipped with resistance wires or ballast resistors be modified according to the installation manual. In all applications in order to achieve the advertised performance gains and system reliability, the integrity of the electrical system should be checked.

- For use on 8 cylinder engines
- 12 volt negative ground systems
- Requires 12-14 Volts
- Must use suppression core ignition wires
- Not for use with CD or multiple spark systems
- Lobe sensor design triggers off the point cam or reluctor and does not require a magnet sleeve
- Not intended for marine use.

71181 FOR DELCO DISTRIBUTORS

This kit takes just a few minutes to install and is hidden entirely under the distributor cap. Developed for 1957-74 Delco point type distributors with mechanical advance weights on top.

71181

- | | |
|-------------------|--------------------|
| 1957-74 AMC | 1957-74 GMC |
| 1957-74 Buick | 1966-74 Jeep |
| 1956-74 Cadillac | 1956-74 Oldsmobile |
| 1964-74 Checker | 1957-74 Pontiac |
| 1957-74 Chevrolet | 1960-66 Studebaker |

71281 FOR MOTORCRAFT DISTRIBUTORS

Our 71281 kit retrofits Motorcraft single point vacuum advance distributors. We have completely redesigned the advance plate assembly utilizing a custom nylon glide hub which provides smooth trouble free operation.

71281

- | | |
|---------------------|-----------------|
| 1957-74 Ford | 1957-74 Mercury |
| 1957-74 Ford Trucks | 1971-72 Pantera |
| 1957-73 Lincoln | |

71381A FOR CHRYSLER DISTRIBUTORS

71381A fits Chrysler aluminum bodied single point distributors with vacuum advance. This kit features a completely redesigned advance plate assembly utilizing a custom nylon glide hub which provides smooth trouble free operation.

71381A

- | | |
|------------------|------------------|
| 1962-75 Chrysler | 1959-72 Plymouth |
| 1960-72 Dodge | |

71281D FOR DUAL POINT MOTORCRAFT DISTRIBUTORS

Dual point and dual point vacuum advance Motorcraft distributors which were used in high performance Ford, Mercury and Pantera applications will certainly benefit from our 71281D Ignitor III conversion. This kit simply installs in place of the points and offers performance levels well beyond the reach of points systems.

71281D

|-----------------|-----------------|
| 1960-72 Ford | 1972-74 Pantera |
| 1960-73 Mercury | |

7HO-181 FOR HOLLEY GOLD BOX DISTRIBUTORS

Holley gold box distributors have never before been known for their performance or reliability... until now. We've developed this 7HO-181 Ignitor III system to replace the factory electronics. 7HO-181 fits entirely within the distributor and triggers off the reluctor.

7HO-181

- 1972-81 IHC Trucks

7ML-181 FOR MALLORY POINT TYPE DISTRIBUTORS

Tired of replacing points in your Mallory single or dual point non-vacuum distributor? Want more power? Our 7ML-181 will install in just minutes and has all the features you would expect from a high performance ignition but fits entirely in the distributor.

7ML-181

APPLICATION NOTES

Great effort has gone into insuring the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Read all footnotes before ordering.
- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits. Many kits are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- Applications are based on the vehicle's original equipment.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.
- New applications appear in red.

ELECTRONIC IGNITION CONVERSIONS

AFTERMARKET DISTRIBUTORS

Not getting the performance you expected out of your "brand name" points distributor? Tired of replacing expensive burnt-out optical modules? Then you have come to the right place. Chances are PerTronix makes Ignitor or Ignitor II kit to convert your distributor which will improve reliability and increase your ignition performance.

APPLICATIONS BY DISTRIBUTOR PART NUMBER

We have Ignitor and Ignitor II kits which are made to fit specific distributor types and part numbers. Many of these kits are not tied to a particular vehicle application. If you can't find what you need in the application section of our catalog, use this look up. If its not here, that doesn't mean that we don't have it. If you are interested in a kit for a specific distributor please call (909) 599-5955.

APPLICATION NOTES

Great effort has gone into insuring the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Read all footnotes before ordering.
- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits. Many kits are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- Applications are based on the vehicle's original equipment.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.
- New applications appear in red.

FOOTNOTES

- 2 Factory electronic ignition
- 21 See page 62 for complete replacement distributors
- 22 Clockwise rotation
- 55 Also available in 6-volt negative ground, add N6 to part number
- 56 Also available in 6-volt positive ground, add P6 to part number
- 57 Also available in 12-volt positive ground, add P12 to part number
- 79 Ignitor II applications can not be used with solid core ignition wires

APPLICATION NOTES

Great effort has gone into insuring the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Read all footnotes before ordering.
- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits. Many kits are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- Applications are based on the vehicle's original equipment.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.
- New applications appear in red.

FOOTNOTES

- 21 See page 62 for complete replacement distributors
- 23 Front mount distributor
- 24 Counter clockwise rotation
- 31 Remote mount coil conversion kit included
- 55 Also available in 6-volt negative ground, add N6 to part number
- 56 Also available in 6-volt positive ground, add P6 to part number
- 57 Also available in 12-volt positive ground, add P12 to part number
- 79 Ignitor II applications can not be used with solid core ignition wires
- 82 Will not fit magneto type distributors
